To whom it may concern,

I am writing this testimony of my healing experience with Marcia Lowry. I experienced a complete healing of ovarian issues following a session with Marcia. She graciously assisted by clearing blocks with a lovely attitude and a sincere commitment to my well-being. I give her my highest recommendations and gratitude.

Thanks,

Sara M. W.

Background:

This healing was a special one to me. I participated in a yearlong psychic development class in 07-08. Graduates are invited to attend a small weekly class for advanced students, for what I would describe as mostly guided meditation with a couple of opportunities to share individual experience or ask a question. In recent years, I only attend on rare occasions. The day before this healing I had a strong internal nudge to go to class. Sara attended that class from another state via skype. I barely paid attention to her dialogue with the teacher when it was her turn to share, but I suddenly became aware of body chills and became alert in time to hear that Sara was asking about an acute health problem. It was causing her pain, and she was unable to return to the specialist for a recommended procedure due to lack of health insurance. At the end of class Sara asked about this again, and again I noticed chills in my body along with a powerful sense of being able to help her. Though I had never met Sara before, her mother happened to be a recent friend. I contacted Sara's mother to let her know that if Sara was interested, I would be happy to do a long distance healing on her. I heard back from Sara almost immediately and we set up a session for that evening. I still remember it well, as it was one of the easiest and loveliest healings I had been a part of. My perception is that Sara was so eager, open, and ready to heal herself, that I connected with her fully and immediately. So much was released in that session, and it felt as though Sara was expertly copiloting with me to get what she needed to heal. That night was a beautiful experience, the love in the room was absolutely amazing. This healing re-affirmed the irrelevance of distance when doing energy healing, and provided a glimpse of the greatly varied degrees that clients contribute to their own healing through their openness and readiness to heal. I already had an email waiting for me in the morning of profound gratitude from Sara, who had immediate multi-symptom relief and the complete resolution of what she had only shared in the class to be ovarian cysts.
